Transmission Cooler - Universal

\$86.36

[Perma Cool - Thin Line Transmission Cooler Kit](#)

Coil Size: 3/4" X 5 X 15-1/2" Push On

To suit all model vehicles - dramatically cools down transmission fluid temperature, extending longevity and reducing flaring and other transmission slippage problems. Many Mitsubishi models do not run a transmission oil cooler and as such, respond extremely well to the fitment of these units.

Very easy to fit and very highly recommended.
